

4060 SHOCK COMPATIBILITY

What size shock is compatible with the SCOR 4060?

The SCOR 4060 is designed for a 205 mm eye-to-eye trunnion mount shock with a shock stroke of 65 mm for the LT configuration, and 57.5 mm for the ST configuration.

Can I run a coil shock on the SCOR 4060?

Absolutely. The SCOR 4060 is designed to be able to work equally well with either an air or coil shock, giving you the choice as to how you stay sprung. The frame is designed to accommodate coil shocks from Fox and RockShox, Öhlins will fit as well. Before buying a coil shock from another brand you'll want to check clearances.

Do I need additional hardware if I buy a SCOR 4060 frame and a compatible shock?

No, the mounting hardware is included when you buy a SCOR frameset without shock.

Shock specifications

Eye-to-eye:	205 mm, trunnion mount
Stroke:	65 mm (LT), 57.5 mm (ST)
